ABOUT ME

Recent Higher Certificate in Software Development graduate, currently advancing my studies in Business Information Systems while working full-time in an administrative role. My professional experience has given me a strong understanding of business operations, which I combine with a project-driven approach to building technical solutions. I am looking to transition into an entry-level developer or analyst role where I can apply both my technical and business skills to contribute meaningfully and grow within a team.

EXPERIENCE

2024 – Present	Site Administrator <i>Emadwaleni Holding (Pty) Ltd</i> - Coordinated material procurement for a 16-member team, managing logistics and ensuring continuous project delivery - Maintained daily site logs and compiled progress reports, applying structured data tracking and documentation practices - Processed payroll and managed contract documentation using Excel, ensuring accuracy and consistency across records - Captured and organised site photography, maintaining a structured digital archive for project reporting - Served as the primary communication channel between site personnel and management, facilitating clear and efficient information flow across a 16-member team - Identified, logged, and escalated on-site issues, supporting rapid resolution and minimising operational downtime
----------------	---

EDUCATION

03/2025 – 03/2026	Higher Certificate in Software development <i>Stadio Higher Education</i> 
2019 – 2023	National Senior Certificate (Matric) <i>Hoerskool Roodepoort</i>
03/2026 – Present	Bachelor of Business Information Systems <i>Stadio Higher Education</i> 

Projects

09/2025 – 11/2025	HRMS (Human Resource Management System) A web-based HR management system built with Python (Flask), HTML, CSS, and JavaScript. Developed to manage core HR functions, demonstrating full-stack development skills and an understanding of business systems.
-------------------	---

04/2025 – 05/2025	IT Course Promoting Website A simple promotional website designed to market an IT course, demonstrating skills in layout design, content structure, and front-end presentation.
02/2025 – 03/2025	Calorie Counter A simple web app that helps users take control of their daily nutrition. Log meals, track calories in and out, and calculate personal goals — all in one clean, easy-to-use interface.
07/2024 – 11/2024	Vinyl Store A simple e-commerce style website for browsing and purchasing vinyl records, showcasing product layout, navigation, and front-end design skills.
02/2024 – 04/2024	RPG Game A simple browser-based RPG with a clean user interface, built to explore interactive game logic, state management, and dynamic UI rendering using vanilla JavaScript.
